i.d. mate II

i.d. mate II is a portable electronic device that scans the bar code or UPC on an item and can identify that item and much more! The i.d. mate II can be used at home or on the go to identify cans, jars, boxes, bottles, clothing, playing cards, prescription drugs, compact discs, albums, cassette tapes, pictures, important documents and the list goes on and on! In fact, any item that is not easily identifiable by means of the other senses is a candidate for i.d. mate II.

The Head-Start UPC Product Database stores over three-quarters of a million items. Many of the descriptions contained in this database provide extended package details beyond just the description. Examples of the extended data include:

- Instructions
- Ingredients
- Nutritional Information
- Package Size
- Warnings
- Miscellaneous package details

i.d. mate II Features

- **Portability** Measures 11" x 4" x 4" and weighs less than 2 lbs.
- **No PC required** Although it integrates fully with a PC, you don't have to

be PC literate to use. It's as easy to use as a cassette player!

- **Easy to personalize** i.d. mate II allows the user to associate any number of recorded voice messages with a scanned bar code. When that bar code is scanned in the future, the recorded descriptions are played back.
- **Memo Recorder** In addition to identification of products, i.d. mate II can be used as a digital memo recorder. The user can use it to record, play, and erase any number voice memos.
- **Omni-directional Scanner** i.d. mate II uses an omni-directional scanner, so there is no need to visually locate the bar code on the label. The omni-directional scanner can read the barcode in any direction. The user simply rotates the scanner around the product to get a reliable read every time. The Omni-directional scanner is completely portable and is enclosed in handy carrying case for protection.
- **Uses standard removable flash memory cards** Each removable flash memory card is about the size of a matchbook. The largest flash card available contains over 2 gigabytes of memory. So, storage issues for huge databases are no longer a factor. As for recorded messages, the user can get many many hours of record time on a single card.
- **Battery operated for portability.** The unit has a high-output, battery pack with a life of 200-plus bar code scans. It is also fully operational when plugged into a standard AC wall outlet.
- **Easy Sound Controls** Volume control and an ear plug jack for privacy.

The i.d. mate II package includes the following: i.d. mate II; Bar Code Scanner; Carrying Case with Strap; 4 High-Capacity Ni-Cad Batteries; AC/DC power adapter; 100 Pre-printed Bar Code Labels (used for items that don't have an existing barcode); and either a 128 MB or 1 GB CompactFlash Memory Card.

Sendero Group Online price: \$1549 for 128 MB Storage and \$1779 for 1 GB Storage
