i.d. mate is capable of reading a bar code and storing an associated recorded description of the item onto a removable flash memory card. The next time the same bar code is scanned, i.d. mate recalls the stored verbal message and plays it through the internal speaker.

The i.d. mate is completely portable and battery operated. The unit has four high-output, rechargeable AA batteries with a life of 200-plus bar code scans. It is also fully operational when plugged into a standard AC wall outlet or cigarette lighter. The unit also has volume control and an ear plug jack for privacy.

Each removable flash memory card is about the size of a credit card. The largest flash card available can store over four and a half hours of record time.

UPC Bar Code

Omni-directional Scanner

When i.d. mate is used with an omni-directional scanner, there is no need to visually locate the bar code label. The omni-directional scanner can read the barcode in any

direction.

Thus, the user simply rotates the scanner around the product to get a reliable read every time. The Omni-directional scanner is completely portable and is enclosed in handy carrying case for protection.

Memo Feature

In addition to identification of products, i.d. mate can be used as a digital memo recorder. The user can use it to record, play, and erase any number voice memos.

Uses for i.d. mate

i.d. mate can be used in the home or in the workplace to identify cans, jars, boxes, bottles, clothing, playing cards, prescription drugs, compact discs, albums, cassette tapes, pictures, important documents and the list goes on and on! In fact, any product or item that is not easily identifiable by means of the other senses is a candidate for i.d. mate.

Pricing - Please call us for pricing. We have many different scanners and memory options.
